Alexander Martin

Boise, Idaho | hockey4alec@gmail.com | (208) 215-8080

SKILLS

Mathematics: Linear algebra, Ordinary differential equations, Multivariable calculus, Probability and statistics, Discrete mathematics, Generating functions, Recurrence relations, Mathematical proofs, Numerical methods fundamentals
Programming and Tools: Python, MATLAB, Git, GitHub, LaTeX/Overleaf, VS Code, HTML, CSS
Data and Computation: Numerical computation, Algorithmic problem solving, Exploratory analysis, Basic statistical analysis, Data cleaning, Scientific visualization
Professional Strengths: Technical communication, Quantitative instruction, Lesson planning, Team mentoring, Quality assurance, Operations coordination

EXPERIENCE

Mathematics Tutor October 2025 – September 2026
Grade Potential Tutoring *Boise, Idaho*

- Delivered targeted instruction in algebra, trigonometry, and general mathematical problem-solving to high school students.
- Developed individualized lesson plans to identify learning gaps, build conceptual understanding, and help students progress toward academic goals.
- Explained multi-step quantitative concepts clearly, adapting methods and examples to different learning styles.

Head Pole Vault Coach February 2024 – Present
Boise High School *Boise, Idaho*

- Lead a competitive pole-vault program, planning athlete development and coaching technical execution, safety, and performance improvement.
- Collaborate with Olympic-level coaches to incorporate advanced training techniques and specialized strategies.
- Mentor student-athletes through goal setting, performance analysis, constructive feedback, and consistent practice plans.

Shift Lead / Line Cook January 2021 – Present
Parrilla Grill *Boise, Idaho*

- Coordinate kitchen operations, staff workflow, food quality, and service execution in a high-volume, fast-paced environment.
- Support staff supervision and maintain quality-assurance standards while prioritizing safety, accuracy, and timely completion of work.

PROJECTS

Generating Functions Analysis Spring 2025 – Spring 2025
Discrete Mathematics, Boise State University

- Developed an analysis of generating functions as a method for solving recurrence relations.
- Applied combinatorial techniques to enumerate sequences and model mathematical structures.
- Used discrete-mathematics theory and proof-based reasoning to communicate assumptions, methods, and conclusions.

Mathematical Computing and Visualization
MATLAB & Python

- Developed scripts for mathematics coursework to implement computational methods, evaluate mathematical expressions, and generate visualizations.
- Applied linear algebra and differential-equation concepts to structured problem solving and computational analysis.
- Created plots and charts to communicate numerical results clearly and verify calculations.

AWARDS & HONORS

- Idaho Science and Aerospace Scholar
- State Soloist, First Place, Viola (2021)

EDUCATION

Boise State University Boise, Idaho
Bachelor of Science, Mathematical Sciences | Minor in Music. Dean's List with High Honors (Fall 2025); Dean's List with Honors (Spring 2024, Fall 2024, Spring 2025, Spring 2026). *December 2027*
GPA: 3.769 / 4.000.
Relevant Coursework: Calculus I–III, Multivariable & Vector Calculus, Discrete Mathematics, Differential Equations with Matrix Theory, Linear Algebra, Introduction to Programming in Mathematics, Physics I with Calculus, Probability & Statistics I (current), Introduction to Computational Mathematics (current), Mathematical Proofs & Methods (current), Foundations of Analysis (current), Abstract Algebra / Number Theory (current)
